## ABOUT ME

---

I am a junior back-end developer with experience in building web, desktop, and real-time applications. I primarily work with Python and frameworks such as FastAPI and Flask, along with tools like SQLite, WebSockets, and Git. I stand out for my ability to learn independently, solve problems efficiently, and collaborate in Linux environments. I am currently looking to join a team where I can continue growing as a professional and contribute value through software development.

## EXPERIENCE

---

### Back-End Developer

Argentina

*MozoPlus*

2024

- Together with two teammates, I developed a real-time ordering solution for restaurants.
- The backend was implemented using FastAPI.
- Communication was managed through an endpoint hosted on the main PC.
- The system stores persistent data locally using JSON files and a SQLite database.
- Technologies: FastAPI, WebSockets, SQLite, JSON, Python.

### FullStack Developer

Argentina

*Opinion Scope*

2024

- I developed a web application for analyzing opinions from platforms like Reddit and Google News.
- I applied NLP techniques such as sentiment analysis with TextBlob, tokenization, sarcasm detection, content deduplication using hashing, and term frequency analysis.
- Performance optimization using `lru_cache` and `ThreadPoolExecutor`.
- The web interface was built from scratch using HTML, CSS, and JS, including interactive visualizations (likely with Chart.js).
- Technologies: Python, Flask, TextBlob, BeautifulSoup, aiohttp, asyncio, HTML, CSS, JavaScript.

### Web Developer

Argentina

*Emotional Coaching Website (client)*

2025

- I designed and developed a landing page from scratch for a client in the emotional coaching field.
- I implemented a functional contact form that automatically sends messages via Gmail SMTP.
- The site was deployed on a self-managed server hosted in Oracle Cloud, with SSL certificates managed through Cloudflare.
- Technologies: HTML, CSS, JavaScript, Python, SMTP, Oracle Cloud, Cloudflare.

## SKILLS

---

**Languages:** Python, C, SQL, Bash

**Technologies:** Linux, Git, FastAPI

**Languages Spoken:** Native Spanish, Basic English (technical reading)

## EDUCATION

---

### ISFT 204, Argentina

*In progress*

*Associate Degree in Software Development*

### CFP 403, Argentina

*2023-2024 Completed*

*Application Testing*

### CFP 403, Argentina

*2023-2024 Completed*

*Programming (Languages: C, Python, SQL)*
